

UMESH UDAYAN

AWS Solutions Architect Intern | Cloud Architecture | Python | AWS

Manchester, UK · +44 7553 929941 · umeshudayan1084@gmail.com · linkedin.com/in/umeshudayan9961 · github.com/umeshudayan

PROFILE

MSc Cyber Security graduate (University of Salford, 2025) with hands-on AWS experience building real attack testbeds, running penetration tests, and writing Python automation scripts. Currently working at Amazon UK and familiar with how Amazon operates. Available full-time from September 2026. UK Graduate Visa valid until January 2028.

TECHNICAL SKILLS

AWS Services	EC2, S3, VPC, IAM, CloudFront, GuardDuty, CloudTrail, ACM, IAM Access Analyzer
AWS Framework	Well-Architected Framework (all five pillars)
IaC & Pipelines	Terraform, GitHub Actions, CI/CD pipeline security
Programming	Python (automation, log analysis), Bash, SQL, Git
Networking	TCP/IP, DNS, DHCP, TLS 1.3, LAN/WAN, VPC architecture
OS	Linux (Kali, Ubuntu, Amazon Linux), Windows 10/11
Security	MITRE ATT&CK, OWASP CI/CD Top 10, CVSS v3.1, Google SLSA, GDPR

WORK EXPERIENCE

Amazon UK Services Ltd (DXM2), Manchester

March 2025 – Present

Sortation Associate — RTS & Problem Solving

- Managed 15–25 delivery partners per shift, resolving 40–60 exceptions daily using structured problem-solving within strict SLA targets — 99%+ accuracy sustained throughout.
- Took informal leadership during 20–30% peak surges, onboarding new associates and keeping operations running without being asked to.
- Recognised with the **Amazon in the Community Award (September 2025)** for consistent alignment with Amazon Leadership Principles.

Luminar Technolab, Kerala, India

June 2023 – October 2023

Software Testing Intern

- Found and documented 50+ bugs across test cycles using Python scripts and SQL queries to validate data integrity.

PROJECTS

CI/CD Pipeline Security in AWS — Attack Simulation & Detection ↗

2025

MSc Dissertation — University of Salford

- Built a real AWS testbed using Terraform and GitHub Actions, introduced deliberate misconfigurations, and ran 3 MITRE ATT&CK-mapped attacks (CVSS 9.0, 8.5, 8.2).
- Found that GuardDuty raised zero alerts on pipeline abuse despite full CloudTrail logging — a genuine detection gap with real implications.
- Wrote Python scripts to automate CloudTrail log analysis and identify detection gaps faster.
- Delivered a Five-Pillar DevSecOps framework aligned to OWASP CI/CD Top 10 and Google SLSA.

AWS Cloud Misconfiguration Security — S3 & EC2 Penetration Testing ↗

2025

University of Salford

- Built a misconfigured AWS testbed and ran 5 penetration tests using AWS CLI, curl, and SSH — simulating S3 data leakage, IMDSv1 credential theft, and IAM privilege escalation.
- Replicated the Capital One 2019 attack technique by extracting IAM credentials via unauthenticated metadata queries.
- Mapped findings to OWASP Top Ten and recommended mitigations including IMDSv2, S3 Block Public Access, and GuardDuty monitoring.

EDUCATION

MSc Cyber Security, Threat Intelligence & Cyber Forensics

January 2024 – September 2025

University of Salford, Manchester

- Modules: Network Security, Digital Forensics, Threat Intelligence, Risk Management, Incident Response.

BSc Computer Science (Merit)

2020 – 2023

University of Kerala, India

- Modules: Networking, Databases, Software Development, Operating Systems, Algorithms.

ADDITIONAL INFORMATION

Certifications: AWS Solutions Architect Associate (Planned Q3 2026) · **Recognition:** Amazon in the Community Award, Sep 2025

· **Right to Work:** UK Graduate Visa until Jan 2028 · **Availability:** Full-time from Sep 2026 · **Languages:** English (professional),

Malayalam (native), Hindi (conversational)
